ABSTRACT

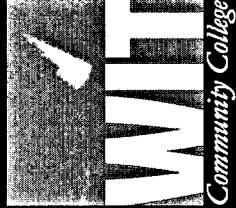

Western Iowa Tech Community College (WITCC) is a publicly supported comprehensive college serving the Iowa counties of Cherokee, Crawford, Ida, Monona, Plymouth, and Woodbury, which have a combined population of about 170,000. This fact book presents statistics, such as the following: (1) 7,113 WITCC students earned over 89,311 credit hours during fiscal year 2002, or about 13 per student; (2) 53% of WITCC's students were women in fall 2002; (3) 687 degrees, diplomas, and certificates were earned by WITCC students in fiscal year 2001; (4) total minority enrollment in 2002 was 519, up from 214 in 1995; and (5) in 2002, 29% of WITCC students were under 18, 20% were 18-19, 21% were 20-21, 10% were 22-24, 9% were 25-29, 6% were 30-34, 4% were 35-39, 7% were 40-49, and 2% were 50-64. In addition, a student satisfaction survey, administered to 432 students, with a completion rate of 60%, indicated that 47% of students had attainment of an associate degree as their stated goal, while 20% were pursuing transfer, and 6% job-related training. Instructional effectiveness rated highest in importance and satisfaction, with registration effectiveness and academic advising rating second and third, respectively, in both categories. Revenues of \$20,627,140 came from tuition and fees (44.5%), local support (5.4%), state general aid (38.5%), federal support (4.4%), and other state support and sales and services. This report also discusses the economic impact of WITCC, financial aid, student outcomes, graduation rates, and placement and employment analysis. Contains approximately 80 tables. (Author/NB)

Data presented here come from a variety of sources. The information is current for the academic year 2000-2001, though in some instances the most recent reliable date may date as far back as 1996. Additionally, when available, information from 2001-2002 is presented. Sources include:

10-day enrollment reports	Reported by the college the 10 th day of each semester.
IPEDS (Integrated Postsecondary Education Data System)	Reported by the college. IPEDS data are available through the website of the National Center for Educational Statistics [http://www.nces.ed.gov/ipeds/].
Iowa College Student Aid Commission	The college also reports to the ICSAS which provides some information through its website [http://www.state.ia.us/government/icsac/facts.html].
Iowa Department of Education	The Iowa DE publishes profile data of the community colleges, much of which is collected through the CE4b. While some of this is in traditional printed form, many of its documents are at the DE website (including K-12 data) [http://www.state.ia.us/educate/programs/commcoll/index.html].
CE4b	The Iowa annual reimbursement report for credit and noncredit programs, as reported by all of the community colleges in the state to the Department of Education.
Kirkwood Community College	Each year KCC distributes a report to the presidents with comparative data for Iowa's Community Colleges.
U. S. Census Bureau	Though the decennial was completed in 2000, much of the census information is projected. Data are available in spreadsheets from the Bureau and through state distribution centers (e.g., [http://ia.profiles.iastate.edu/]).
Student Satisfaction Inventory	Results from the fourth administration of this survey, plus some longitudinal results, are presented.
Economic impact	A study of the College's economic impact on the region was conducted by an independent firm, CC Benefits.
The Dallam Report	Annual Iowa college and university enrollment report.

Western Iowa Tech Community College does not discriminate among students or applicants on the basis of race, creed, color, religion, national origin, sex, or disability. The college makes no distinction in any way among job applicants or employees on the basis of race, creed, color, religion, national origin, sex, or disability.

Mission Statement

As a comprehensive community college, our mission is to provide quality education and to economically enhance the communities we serve. To accomplish the mission, the College will:

- Provide post-secondary occupational education leading to diplomas, certificates, and the Associate of Applied Science degree.
- Provide post-secondary general and transfer education leading to the Associate of Arts or Associate of Science degree.
- Provide basic education for the improvement of academic skills and/or leading to a General Educational Development (GED) diploma.
- Provide economic development programs and assistance.
- Provide lifelong community and continuing education.
- Develop partnerships with educational institutions, businesses, governmental agencies, and communities.
- Develop programs for participation in the global economy.
- Provide student development services to improve the academic success of our diverse student population.
- Provide opportunities for our students to participate in leadership development and in community, social, and recreational activities.
- Maintain a learning and working environment that is safe, clean, and comfortable.
- Provide student and employee support services to operate the College.

Values and Guiding Principles

- Student Learning. We value the personal, intellectual, and occupational growth of our students.
- Quality. We are committed to quality instruction and services to maximize student success and employer satisfaction.
- Access. We provide access to the College by addressing student needs related to time, location, and cost.
- Diversity. We respect individual differences and strive to meet the needs in our diverse communities.
- Lifelong Learning. We promote lifelong learning for personal and professional development.
- Academic Freedom. We are dedicated to the free exchange of ideas and information which promotes our growth as an educational institution.
- Shared Governance. We believe in shared governance and encourage our employees and students to contribute to the development of the College.
- Efficiency and Effectiveness. We are committed to continuous improvement and fiscal responsibility within our educational programs and College services.
- Dedication. We value a workplace which promotes mutual respect and cooperation between the College and the employees.
- Professional Integrity. We are committed to high standards of ethics and integrity in our relationships, our professional activities, and the performance of our duties.

College History

Western Iowa Tech Community College is a publicly supported comprehensive community college serving the Iowa counties of Cherokee, Crawford, Ida, Monona, Plymouth, and Woodbury, which have a combined population of about 170,000.

A nine-member Board of Directors provides governance for Western Iowa Tech Community College. The board members are elected from the nine districts in the six-county service area. The College is accredited by the North Central Association of Colleges and Schools and is regulated by the Iowa State Department of Education.

Western Iowa Tech Community College was organized in August 1966, when the Iowa State Board of Public Instruction accepted a plan submitted by the counties of Ida, Monona, Plymouth and Woodbury to merge for the creation of an Area Vocational-Technical School as provided in Chapter 280A of the Iowa Code. This newly created district was named Merged Area 12.

A special school election was held on November 3, 1966, to determine the members of the Board of Directors. The Board selected Dr. Robert H. Kiser to serve as Chief Administrator and named the school Western Iowa Tech.

The first classes began on January 27, 1967, when Western Iowa Tech accepted responsibility for one vocational and two technical postsecondary programs then operated by the Sioux City Community Schools. Western Iowa Tech's growth for the remainder of the year was quite rapid and when the fall term began on August 28, 1967, seventeen full-time programs were in operation.

At the same time, the College assumed direction of all adult basic, high school completion, high school equivalency certificate and occupationally oriented adult education programs.

Western Iowa Tech's boundaries expanded on July 1, 1969, when Crawford County joined Merged Area 12. The boundaries were extended again in April 1971 when Willow Community School District, Aurelia Community School District, and Cherokee Community School District were added.

In 1973, Western Iowa Tech received approval to offer liberal arts courses in Denison, and thus was designated as a community college. When the College received permission to offer a two-year Associate of Arts degree at the Sioux City campus, the curriculum became fully comprehensive, serving both full- and part-time day and evening students throughout the six-county service area. The College has continued to expand program offerings in all divisions, with the arts and sciences division continuing to represent one of the fastest growing areas of the College. The vocational-technical area of the College continues steady growth as well, reflecting the needs of business and industry for a well trained and skilled workforce. The College has forged new partnerships with public schools in the area to provide access to postsecondary education to students in their local community. Services to business and industry have been expanded to meet the need for a well trained workforce.

In 1991, Dr. Robert H. Kiser retired from the presidency of the College after 25 years of service. Dr. Robert E. Dunker, a graduate of the College's first Mechanical Design and Drafting class, was selected by the Board of Directors as the second president to lead Western Iowa Tech Community College.

During the first years of operation, the College offered programs at various temporary locations throughout Sioux City. The College's first administrative home in 1966 was the former Hobson School building located at 222 South Floyd Boulevard. In 1968, the administrative offices were moved to the former Trinity Prep campus at 3075 Floyd Boulevard. As the number of programs and services continued to grow, the need for larger, permanent facilities became increasingly evident.

In 1970, a permanent college campus was established on a 143-acre site at 4647 Stone Avenue in Sioux City.

The first permanent building, the Trades and Industries Building, was completed and occupied during the 1970-71 school year. In November 1972, ground was broken for the Technical and Paraprofessional Building on land adjacent to the Trades and Industries Building. Construction was completed in 1974.

The facility for radio station KWIT was completed in 1978.

KWIT provides public, alternative non-commercial radio programming for northwest Iowa and the adjacent states within an 80-mile radius. In August 2002, KWIT expanded its service radius to 100 miles with the approval and completion of a repeater station, KOJI, at the Iowa Great Lakes.

In the fall of 1980, construction was completed on the Student Center and the Gaylord Smith vocational building. The Student Center provides a gymnasium and exercise room for student and staff use. The building houses Community and Continuing Education, Economic Development, and Business Services. Following remodeling in 1995, it is also the location for a second interactive television Iowa Communications Network (ICN) classroom and the Iowa State University

Extension Service offices. The Smith Building houses numerous vocational classrooms.

On-campus housing for students, Sun Ridge Court Apartments, was constructed in 1982.

Remodeling of the Trades and Industries Building in 1992 added two lecture halls and an interactive television classroom, part of the Iowa Communications Network (ICN) statewide fiber optic network, in the Trades and Industries Building.

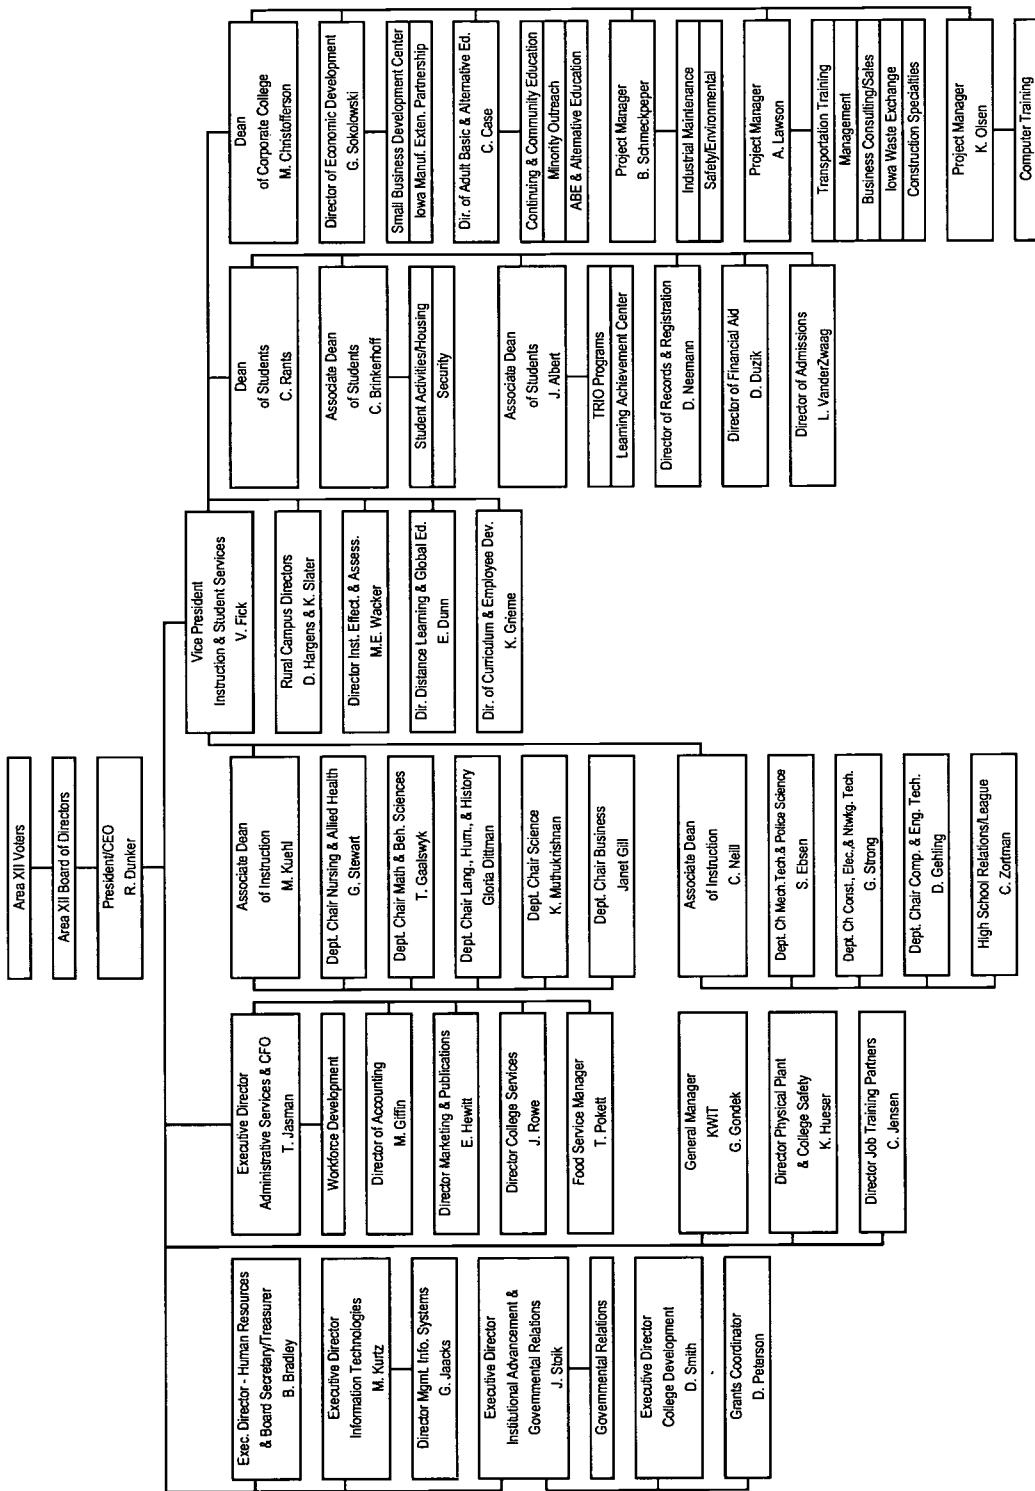

Continued expansion of enrollment and services led to a need for additional facilities. This need was met by an extensive addition, completed in 1994, joining the Trades and Industries building and the Technical and Paraprofessional building. This addition has resulted in an instructional, student service, and administrative facility known as the Dr. Robert H. Kiser Building, named in honor of the College's founding president. Incorporated in this addition are administrative offices, four new science labs, tiered lecture halls, a new bookstore and cafeteria, open seating for students, and an art gallery area.

The Transportation Center, located adjacent to the main Sioux City campus at 5001 East Gordon Drive, is the location for Automotive and Diesel Technology and Welding instruction.

Throughout its history, the College has made a conscious effort to provide educational services to the entire Merged Area 12, with attendance centers in Mapleton, Ida Grove and Le Mars. Through community partnerships, the College constructed and opened the Denison Campus in 1993 and the Cherokee Campus and Conference Center in 1996. Remodeling and expansion of the Denison facility commenced in 2002. These outreach efforts fulfill a growing educational need for the members of rural communities.

The College accreditation was renewed for a 10-year period following the evaluation visit of a team from Higher Learning Commission of the North Central Association of Colleges and Schools in mid-April, 2002.

Community College Facts

The Fall 2001 unduplicated enrollment of degree-seeking students in Iowa's community colleges totaled 68,581, an increase of 4.1 percent over the previous Fall (Dallam, 2001). Credit hours increased 5.27 percent (IDOE, 2001).

Fifty-two percent of these students attended four community colleges: Kirkwood (12,555), Des Moines Area (11,886), Eastern Iowa (6,331), and Western Iowa Tech (4,920) (Dallam, 2001).

The *Des Moines Register* reported preliminary Fall 2002 community college enrollments totaling 74,638, a 5.6 percent increase over Fall 2001 (*Des Moines Register* Sept. 23, 2002, 4A).

Iowa's three state universities enrolled 70,661 in Fall 2001, 3.0 percent more students than Iowa's community colleges enrolled (Dallam, 2001).

In the Fall 2001, the thirty-three private Iowa colleges enrolled 19,775, or 40 percent, fewer students than at the fifteen community colleges (48,806 and 68,581, respectively) (Dallam, 2001).

Women continue to comprise about 56 percent of total community college enrollments (Dallam, 2001). That is slightly higher than the percent of female students at Western Iowa Tech (54 percent in Fall 2001; 53 percent in Fall 2002).

The percent of Iowa residency students remains constant. 90 percent of Western Iowa Tech students enrolled in Fall 2001 were Iowa residents. This compares with 94 percent of all Iowa community college enrollments, 73 percent of state university, and 61 percent of private college enrollments (Dallam, 2001).

Of the 12,066 degrees, diplomas, and certificates awarded by community colleges during FY2001, 687 were earned by Western Iowa Tech students (Nielsen, 2002). In 2001-02, 901 Western Iowa Tech students completed their programs of study.

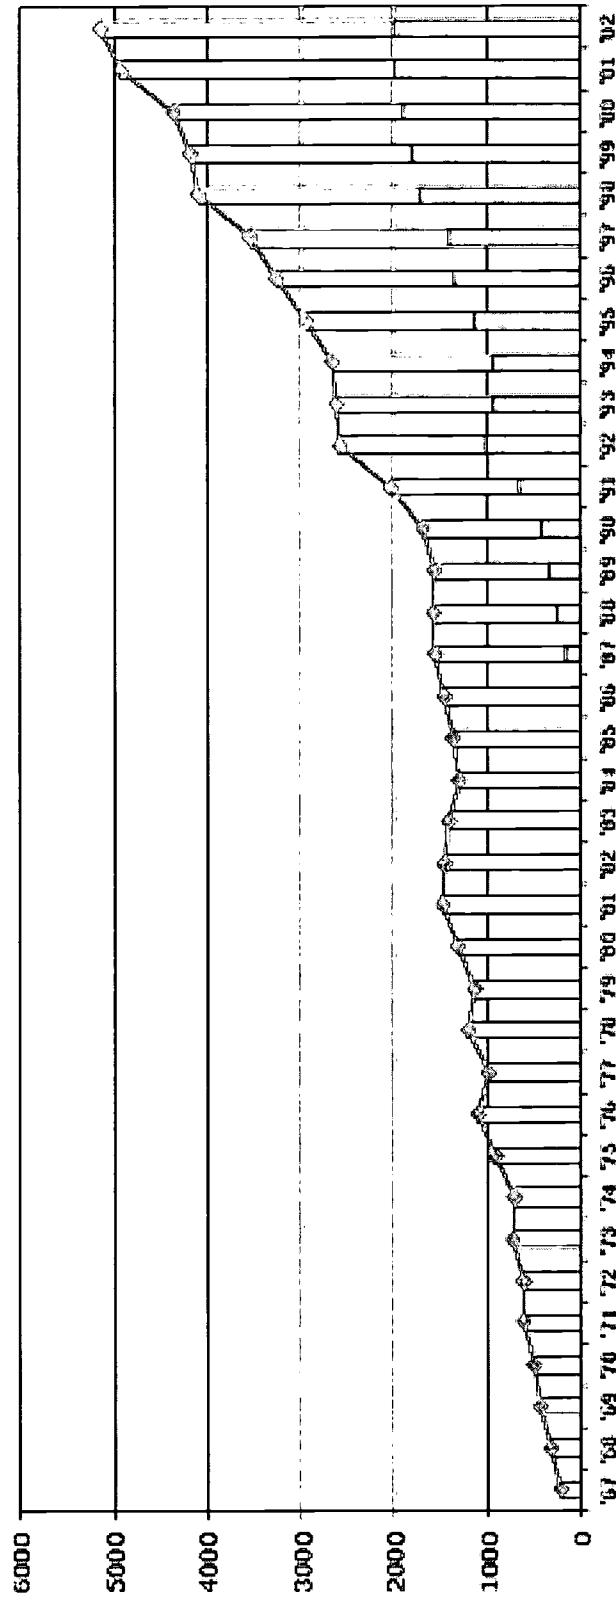

7,113 Western Iowa Tech students earned over 89,311 credit hours during FY2002, about 13 per student (FY2002, CE-4b). 35 percent of the 194,387 students enrolled Fall 2001 in Iowa post-secondary institutions (colleges, universities, business schools, etc.) were enrolled in community colleges (Dallam, 2001).

Student Satisfaction Inventory (SSI): 2001-02

During the 2001-2002 academic year, the Student Satisfaction Inventory (SSI) was administered for the fourth time to students at WITCC. Twenty-six course sections with enrollment of 432 students were randomly sampled from the College's Datatel system. Instructors administered the survey to all students in attendance during their class periods. Two hundred fifty-nine surveys were completed; this represents a response rate of sixty percent.

SSI: Comparative Data

**What's Important to Our Students,
Compared to Those in Other Two-Year Colleges? (Mean
Scores)**

**How Satisfied are WITCC Students,
Compared to Those in Other Two-Year Colleges? (Mean
Scores)**

SSI: Major Findings

- Over three-quarters of respondents report that overall they are "satisfied" with their experiences at WITCC. Fifteen percent are "very satisfied." Sixty-three percent of respondents would enroll at WITCC if they "had it to do over again."
 - On most scales, WITCC students are as or more satisfied than are students in other two-year colleges across the nation. This is especially true in measures of Safety and Security.
 - Highest on the list of items with which students are most satisfied (e.g., we meet their expectations) are items about the helpfulness of our staff, specifically those in Veterans services, the bookstore, library, and security. Students are least satisfied with parking availability.
 - Measures of Instructional Effectiveness rate as most important to WITCC students. This is also most important to students in other two-year colleges across the nation. WITCC students are slightly less satisfied than are students across the nation with their instructional experiences, particularly in the areas of quality of instruction, faculty understanding, and variety of courses offered.
 - Students desire greater individual attention than they currently receive.
 - On every major dimension,** WITCC respondents to the 2001 survey are more satisfied than were those who completed the survey in 1999.

22% of their fathers had college or beyond		
10% have fathers whose "highest school year completed" was middle school/jr. hi		
MOTHERS		
52% of their mothers had high school as "highest school year completed"		
29% of their mothers had college or beyond		
7% have mothers whose "highest school year completed" was middle school/jr. hi		

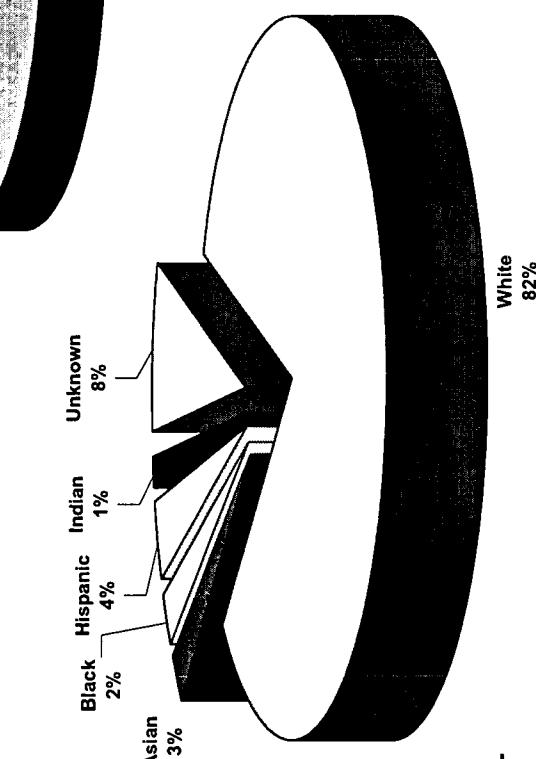

A cohort is a specific group of students established for tracking purposes. In compliance with U.S. Department of Education requirements, each Fall, Western Iowa Tech identifies students who 1) enrolled for credit classes for the first time during the current Fall semester or the previous Summer semester; 2) have completed fewer than 30 total credit hours, i.e., freshmen; 3) are enrolled in the current semester for 12 or more hours, e.g., full-time status; and 4) are pursuing completion of a particular program of study, i.e., degree-seeking.

The academic progress of the cohort is followed for several years to ascertain outcomes of students' experiences at Western Iowa Tech. This page describes the 2002 Fall Cohort, which numbers 570.

Participating Schools In Area XII

- Six League Consortia (25 schools participating, Fall 2001, 1,507 headcount)
 - Cherokee Area League of Schools (4 schools): Aurelia, Cherokee, Marcus-Meriden-Cleghorn, River Valley
 - Denison Area League (8 schools): Ar-We-Va, Boyer Valley, Charter Oak-Ute, Denison, Irwin-Kirkman-Manilla, Manning, Maple Valley, Anthon-Oto.
 - Plymouth Area League (4 schools): Hinton, Kingsley-Pierson, Remsen-Union, LeMars
 - Sac-Ida Area League (3 schools): Battle Creek-Ida Grove, Galva-Holstein, Odebolt-Arthur
 - Siouxland Area League (6 schools): Lawton-Bronson, Sgt. Bluff-Luton, Westwood, Whiting, Woodbury Central, Sioux City.

Headcount for League Classes offered by Western Iowa Tech totaled 1,507, an increase of 38% over Fall 2000 enrollments.

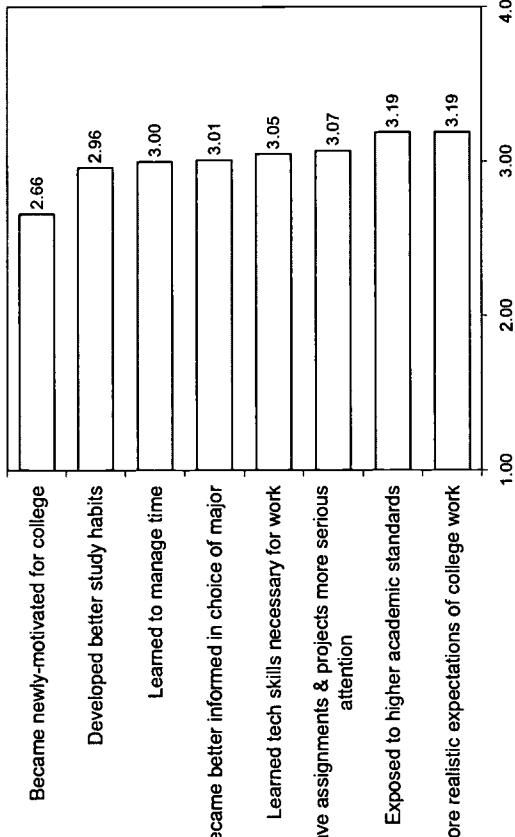

Survey Purpose and Findings

- In the summer of 2001, the Institutional Research Office mailed a brief survey to "League Students" to collect information on:
- 1) the effect of the program on study behaviors,
 - 2) the evaluation of the program and instruction,
 - 3) what influenced their decision to take dual credit classes.
- Ninety-nine percent (99%) would recommend dual credit classes to other high school students.

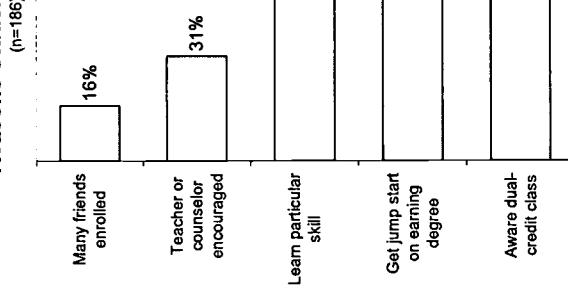

Source: Institutional Research Office, 2002.

Influence on Student Behaviors

Students Report Effect of League Classes (4= Strongly Agree)

Reasons Students Enrolled

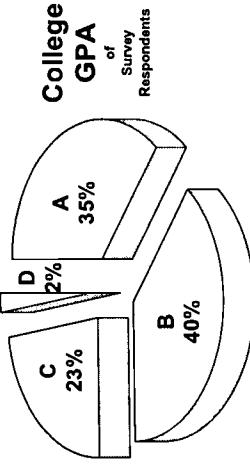

Authorization

The League of Schools is one of several programs for Iowa students authorized under the 1987 Postsecondary Enrollment Option (PSEO) (Iowa Code, Chapter 261C). Under PSEO, eleventh or twelfth grade students (or any ninth or tenth grade student identified as gifted and talented) are eligible to take a college/university course either at the college or high school, or through distance education. The Iowa Department of Education reported that in 1999-2000, 5,978 students enrolled in dual credit courses through this option, including courses taught on college campuses as well as League-type classes. Students may enroll in any of the three state universities, the 15 public community colleges, and accredited private institutions as defined in Iowa's Administrative Rules section 261-9(5).

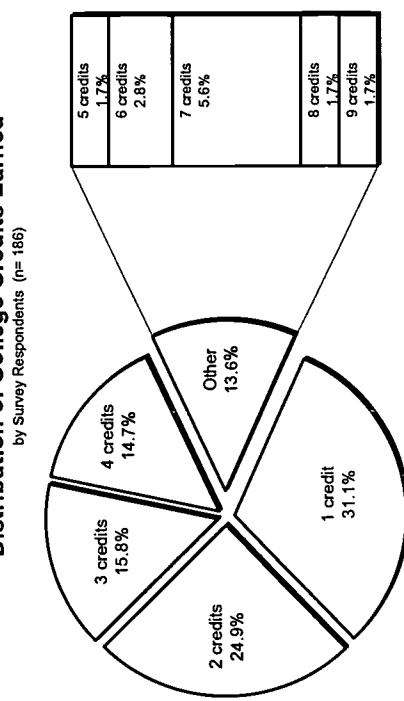

Scale and Purpose of Dual Credit

Dual credit programs are offered in every state. Curriculum content and standards are usually determined by the postsecondary institution, and courses offered on the high school campus are typically taught by high school faculty who hold the same credentials as postsecondary faculty. Concurrent and dual enrollment programs are being encouraged and implemented for a variety of reasons, including:

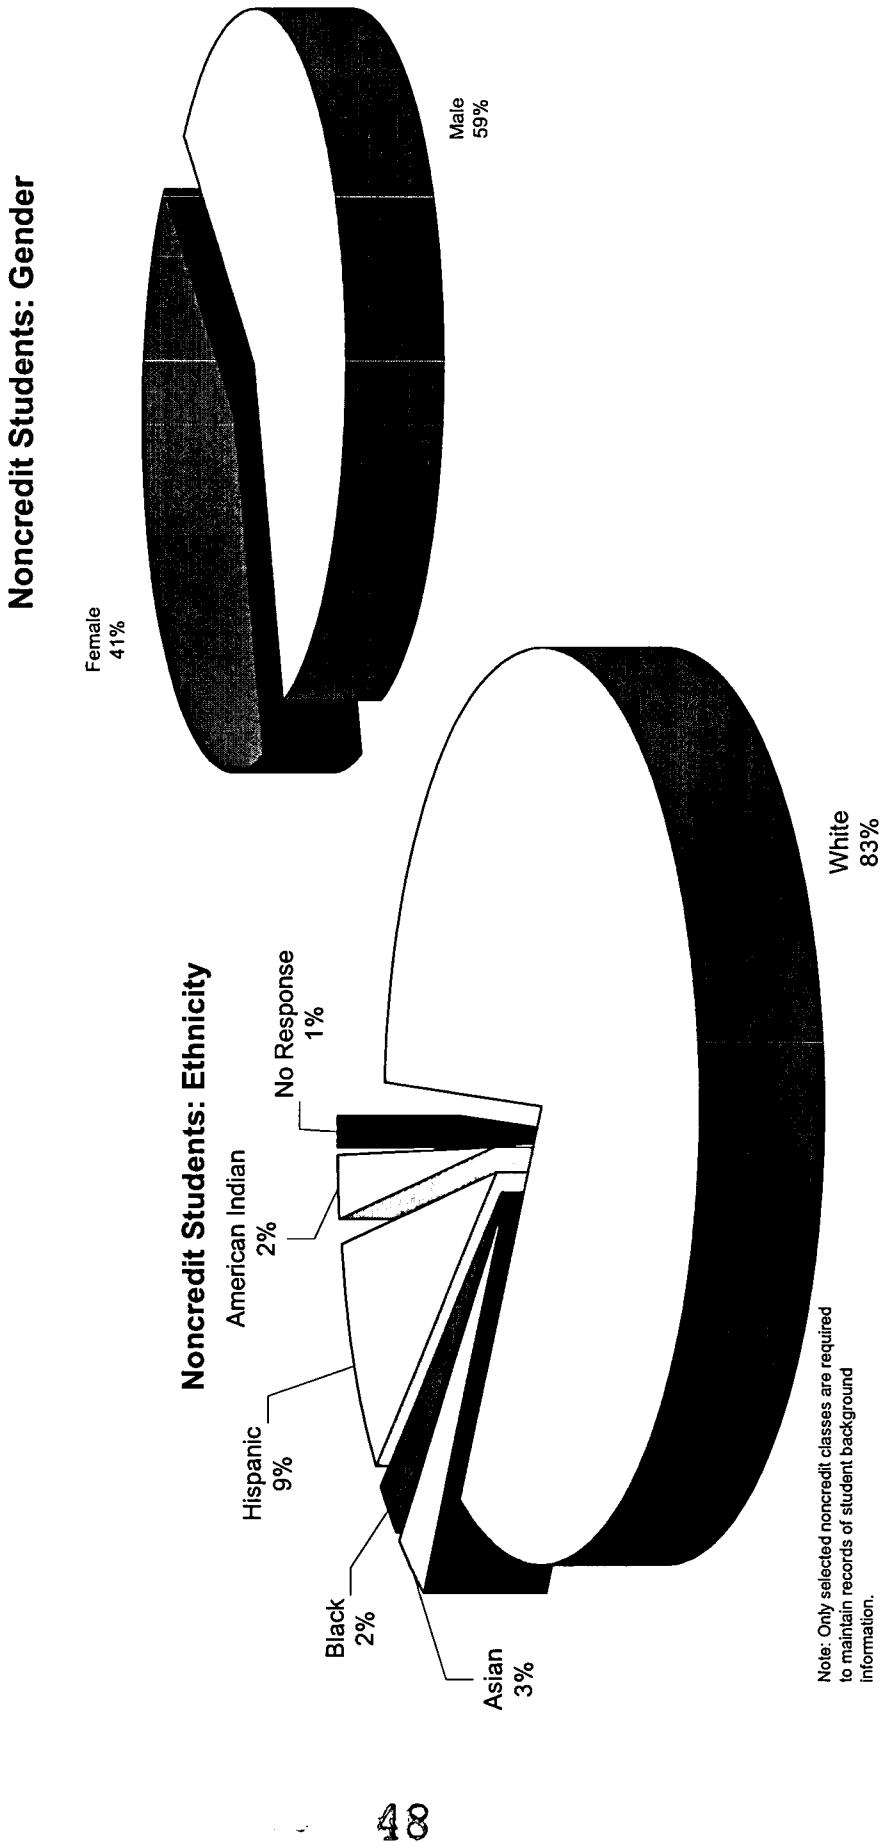

- To promote rigorous academics and to provide more educational options
- To save students time and money on a college degree
- To accelerate student progress towards a degree
- To provide greater academic opportunities for students at small rural schools
- To enhance collaboration between high school and college faculty
- To increase student aspirations to go to college
- To build closer ties between colleges and their communities.

Economic Impact Of WITCC: Fact Sheet

What role does the Western Iowa Tech Community College (WITCC) play in the local economy? Business sales in Western Iowa Tech Community College district are \$410.8 million larger, and labor income is \$151.1 million larger due to the past and present operations of WITCC. The benefits of a robust local economy translate into job and investment opportunities, increased business revenues, greater availability of public funds, and an eased tax burden.

WITCC stimulates the local economy

- WITCC had operating expenses of \$29.1 million in fiscal 2002, and spent \$22.7 million (78%) of this in the Western Iowa Tech Community College district to purchase supplies and pay wages and salaries.
- WITCC issues 700 paychecks per month and paid faculty and staff wages of \$16.1 million in fiscal 2002.
- For every \$1 WITCC pays in wages and salaries, there is another \$0.38 in wages and salaries generated off campus in the Western Iowa Tech Community College district economy—this is the commonly known multiplier effect.

• WITCC activities encourage new business, assist existing business, and create long-term economic growth. The college enhances worker skills and provides customized training to local business and industry. It is estimated that the present-day Western Iowa Tech Community College district workforce embodies over 1.9 million credit and non-credit hours of past and present WITCC training.

• WITCC skills embodied in the present-day workforce increase the output of industries in the Western Iowa Tech Community College district economy where the former students are employed by \$190.71 million. Associated multiplier effects (sometimes called indirect effects) in other industries increase sales by \$202.24 million.

• WITCC skills from current and former students increase wages and salaries in Western Iowa Tech Community College district by \$65.4 million directly, and by another \$63.4 million indirectly in fiscal 2002.

WITCC leverages taxpayer dollars

- State and local government allocated \$12.4 million in support of WITCC in fiscal 2002. For every dollar appropriated by state and local government, WITCC's spending alone generated \$1.79 in wages and salaries in Western Iowa Tech Community College district.
- For every dollar appropriated by the state and local government in fiscal 2002, student earnings will increase by an average of \$2.71 per

year, every year through the rest of their working lives. Likewise, for every state dollar appropriated, Western Iowa Tech Community College district will see social savings of \$0.61 per year, every year (i.e., reduced incarceration and health care expenditures, reduced expenditures on unemployment and welfare, and reduced absenteeism).

WITCC generates a return on government investment

- State and local government support for WITCC in fiscal 2002 will be fully recovered in 5.1 years, in the form of higher tax receipts (from increased student wages) and avoided costs (e.g., from reduced public expenditures on incarceration).
- Accounting for increased tax receipts and avoided costs, state and local government will see a rate of return of 27.6% on their fiscal 2002 support for WITCC.

WITCC increases individuals' earning potential

- 51,740 credit and non-credit students attended the college in fiscal 2002, 68% were employed full- or part-time while attending.
- 97.0% of the students stay in the region and contribute to the local economy after they leave the college.
- Studies demonstrate that education increases lifetime earnings. The average annual earnings of students with a 1-year diploma is \$29,779, or 80.9% more than someone without a high school degree or GED, and 16.0% more than a student with just a high school diploma. The average earnings of someone with an Associate Degree is \$35,021, or 112.7% more than someone without a high school diploma or GED.
- After leaving the college, the average WITCC student will spend 44.3 years in the workforce. The student who leaves with a two-year college degree will earn \$414,059 more than someone with just a high school degree or GED.
- Over their next 44.3 years in the workforce, the average WITCC student's lifetime earnings will increase \$26 for every education dollar invested (in the form of tuition, fees, books, and forgone earnings from employment).
- Students enjoy an attractive 22.3% rate of return on their WITCC educational investment, and recover all costs (including wages foregone while attending WITCC) in 7.2 years.

Business Services	\$226,697	\$12,731	5.6%	
Medical/Educational/Social services	\$510,709	\$32,456	6.4%	
Federal Government	\$86,111	\$3,599	4.2%	
State & Local Government (less the college)	\$363,154	\$10,984	3.0%	
College	\$16,096	\$16,096	100.0%	
Total	\$3,490,817	\$151,070	4.3%	

Overall effect of WITCC on the Regional Economy
 The dollar figures displayed in the third column of the table, "Earnings College-Linked," are the sum of 1) the college's day-to-day operations and capital spending, 2) industry earnings directly arising from skills of WITCC-trained workers employed in the industry, and 3) increased economic growth and business outputs stimulated by regional growth itself, indirectly related to or independent of the actual employment of past WITCC students in particular sectors, e.g., a multiplier effect. The fourth column of the table is the percent of total industry earnings that is attributable to WITCC. The final figure indicates that region-wide earnings are **4.3%**, or **\$3.49 billion**, larger due to the past and present existence of WITCC.

Foundation

The Western Iowa Tech Community College Foundation is a non-profit, philanthropic organization operated exclusively for charitable, scientific, and educational purposes. It was established in 1989 to raise funds to provide broader educational opportunities and service to its students, alumni, faculty, staff, and communities.

Western Iowa Tech Community College Foundation Board members, as of September 30, 2002:

E. B. Baker, C. W. Suter Services	Dr. Robert H. Kiser, WITCC President Emeritus
Larry Book, L & L Builders	E. Joe Lundsgaard, Community Volunteer
Deborah Cook, Great West Casualty Co.	Steven Martens, Wells Fargo Bank
Harlan Crouch, Williams & Co. Consulting, Inc.	Dr. Donald Poppen, Community Volunteer
Dr. Robert E. Dunker, WITCC	Leroy Schoon, Schoon Construction
Richard Grenko, Nichols Rise & Company	Robert A. Simonsen, R. J. Thomas Mfg. Co. Inc.
Marilyn Hagberg, Security National Bank	Dirk J. "Jon" Winkel, Long Lines
Gretchen Hirschbach, Community Volunteer	Fay Wells, Wells Dairy Company
Kim Ingerslev, Professional Computer Services	Charlie Zook, Zook Motors, Inc.
Roland Junck, Community Volunteer	

Foundation Staff: Deb Smith, Executive Director of College Development
Heidi Larson-David, Director of Development

Completions

Completions 1998-99 by Race/Ethnic Status
 Includes Diploma & Associate Degree
 Source: IPEDS

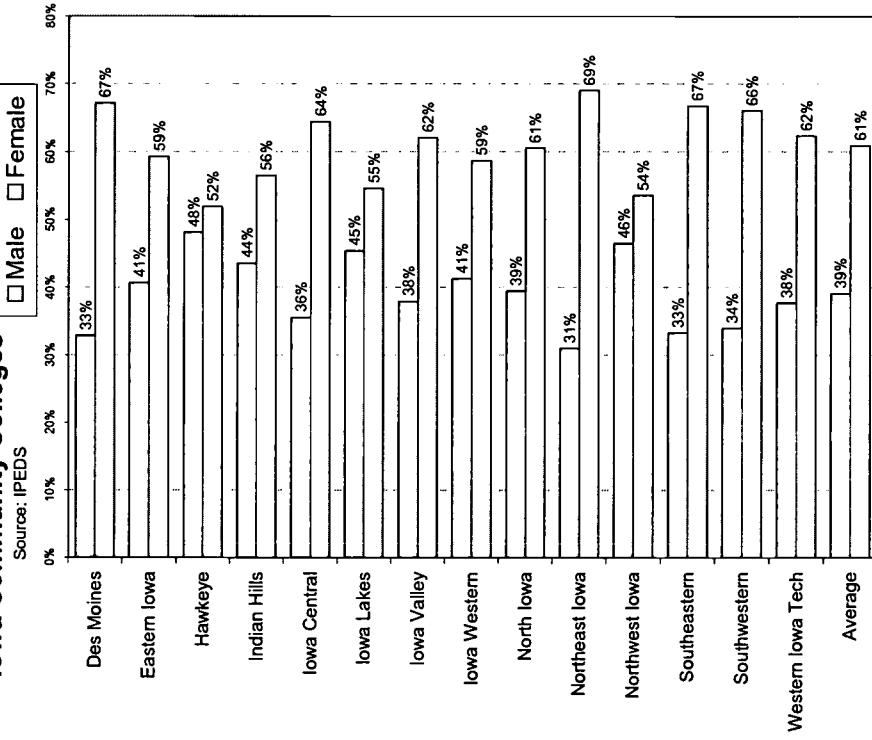

...are standard indicators of educational attainment, and when associations or state governments look at measures of performance, they often focus on completion (or graduation) rates. Completion data answer questions about issues such as access and affirmative action. The Education Commission for the States, for example, tracks "Education Accountability Systems" in 50 States (cf. www.ecs.org).

The charts here describe completions in Iowa's Community Colleges by gender and by race/ethnicity, with percentages reported on a per college basis. Thus, of the degrees and diplomas awarded by WITCC during 1998-99, 4% were earned by Hispanic individuals. These data make a positive statement about institutional climate and support for diversity at WITCC. Completions go beyond admissions rates and make "a real difference in the lives of minority-group students."* **In brief, the total percent for completions by non-white students is higher at WITCC than at any other community college in Iowa.**

COMPLETIONS (CONT.)

Completion rates are routinely reported as Indicators by the National Center for Educational Statistics (Indicator 38, *The Condition of Education 2000*; Indicator 31, *The Condition of Education 2001*). The NCES reports compare attainment by gender and by race/ethnicity. Nationally, the percent of bachelor's degrees earned by women has increased from 43 percent in 1970-71 to 56 percent in 1996-97, for example.

Completions 1998-99 by Gender Iowa Community Colleges

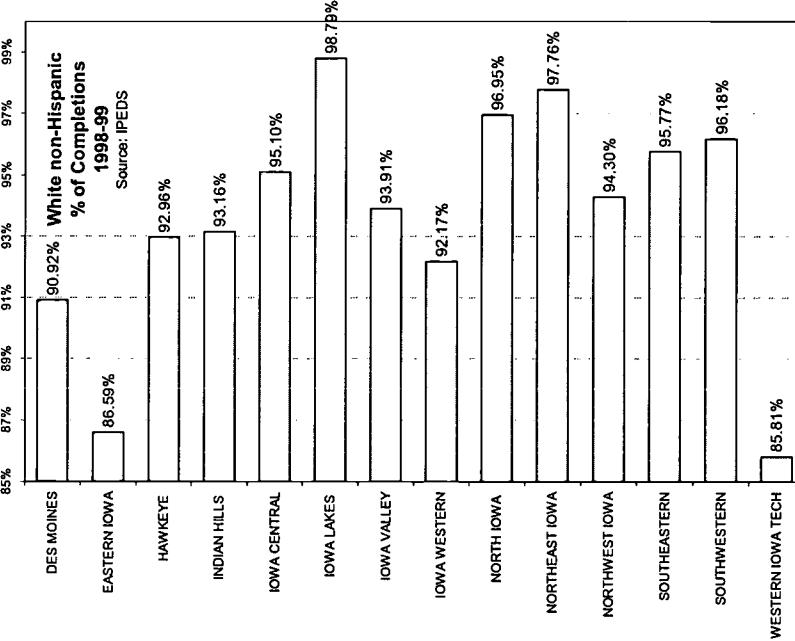

72

The data are based on reports submitted by the colleges to the Integrated Postsecondary Education System (IPEDS), available at the IPEDS Peer Analysis website. IPEDS also tracks **graduation rates** for groups of students, with the standard **cohorts** the "first-time, full-time, degree-seeking freshman" that begins an academic year. The reference point for graduation rates is time-to-degree. Graduation rates for WITCC cohorts are included in a separate report.

Notes

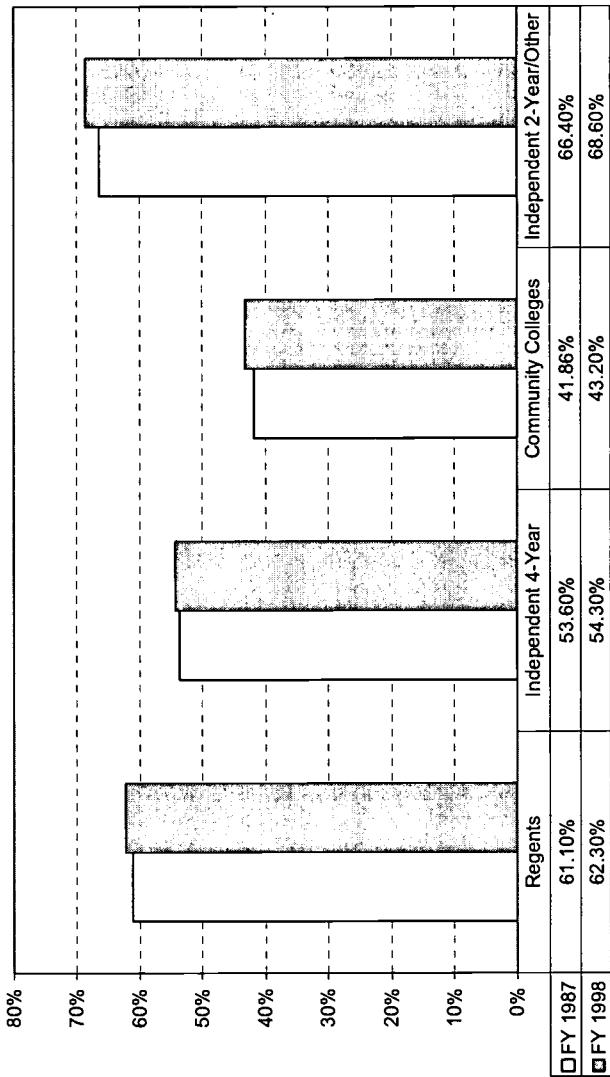

*Clifford Adelman, To help minority students, raise their graduation rates, The Chronicle of Higher Education, Sept. 8, 1998.

The NCES notes that the level of postsecondary completion was based on the Current Population Survey (CPS) which (until recently) grouped associate degrees and diplomas under the category of "some college."

Fact Book 2001-2002

Work and Travel

Mean Travel Time to Work (in minutes)
1990 & 2000

More workers in 2000 were employed outside their county of residence than in 1990. Increased commuting time is a corollary of this trend.

Source: U.S. Bureau of the Census

In each of the counties of the College district, the majority of residential housing is more than 40 years old, creating needs that eventually must be addressed along with infrastructure. This also translates into opportunity for the construction trades.

Give me your tired, your poor,
 Your huddled masses yearning to breathe free,
 The wretched refuse of your teeming shore,
 Send these, the homeless tempest-tossed to me,
 I lift my lamp beside the golden door.
